

# What's the hydrogen water?

Hydrogen water, or hydrogen-rich water, is water that contains a high concentration of hydrogen gas (H<sub>2</sub>, molecular hydrogen). Hydrogen has the function of reducing oxidation in the body.

The process of oxidation harms the body's processes, and is also the cause of aging. Hydrogen molecules reduce the harmful reactive oxygen species (molecules containing oxygen) that oxidation produces, and send them out of the body. Hydrogen is very safe to consume, as it does not accumulate harmfully in the body. Currently, scientific research on its various medical uses and media coverage of its beneficial effects on beauty and health are helping hydrogen water to become a widespread movement in Japan.

## SPEC

Size: Diameter: 66 mm (~2.6 in.)

Height: 245 mm (~9.6 in.)

Weight: 410 g (~14.5 oz)

Capacity: 450 ml (~15.2 fl oz)

Materials: polypropylene, stainless steel, glass, titanium-platinum coating, silicone, etc.

Attachments: USB cord with AC adapter (7.4V 950 mA/h)

Hydrogen Concentration: 0.8ppm-1.277ppm

(Can depend on water quality)

Power: Power supply: AC 100 V ~ 240 V 50 Hz / 60 Hz

Output: DC 5V 1.2A

Battery: Lithium Battery

Recharge Time: Approx. 360 min.

Battery Life: 4 min. mode ... Approx. 20 times

(Can depend on water quality)

Hydrogen water is for these people!

I want to go on a diet!

I worry about my aging.

I want to stabilize my intestinal environment.

I want to change my daily habits.

I want to improve my metabolism.

I have edema or other skin problems.

# hydrogen water

Speedy  
hydrogen  
production in  
4minutes!

# H<sup>2</sup>plus<sup>®</sup>

Take it anywhere  
Portable, rechargeable  
Hydrogen water generator

Hydrogen  
Concentration:  
1227ppb

Recharge  
anywhere  
through  
USB

Speedy hydrogen production in 4 minutes!

# H<sup>2</sup>plus<sup>®</sup> Portable, rechargeable Hydrogen water generator

H2plus is a portable rechargeable hydrogen water generator that allows anyone to enjoy hydrogen water wherever and whenever they want. It achieves the high concentration of 900 ppb in no more than 4 minutes. Its high portability allows it to be taken anywhere, from the office to travels abroad. This portable rechargeable hydrogen water generator is easy to assemble, making maintenance a breeze. This is a fantastic product that allows one to recharge while working at a computer.

## HOW TO

The red LED signals recharge

The green LED signals to complete charging

The blue LED signals production of hydrogen, The LED is off when production are done charging

Press the power switch twice. Hydrogen water production starts for 4 minutes

The USB port for recharging is under this silicone cover

## SET UP

## Advantages of the portable rechargeable hydrogen water generator

### Point 1 Maximum concentration of 1227 ppb

We have achieved a maximum concentration of 1227 ppb on a portable, rechargeable hydrogen water generator. Quench yourself with very rich hydrogen water, wherever and whenever you want!

### Point 2 Outlet and USB recharge available

The product comes with a USB cable that can be used to recharge at mobile locations such as a computer. With the included USB outlet adapter, recharge through an electrical outlet is also possible.

### Point 3 Easy to maintain and set up

This product's smart design allows it to be cleaned very easily. It is divided into parts, so it is also easy to assemble and set up. The socket part is coated with platinum as an anti-rusting measure.
